Education

Indian Institute of Information Technology, Nagpur *Aug 2023 – Jul 2027* | *CGPA: 8.39*
B.Tech, Computer Science & Engineering — Data Science & Analytics Specialization Nagpur, India

Relevant Coursework

Data Structures & Algorithms | Machine Learning | Database Management Systems | Linear Algebra (for ML)
Artificial Intelligence | Data Science & Analytics | Probability & Statistics | Object-Oriented Programming

Experience

NHPC Limited | **Certificate** *May 2025 – Jun 2025*
Software Development Intern — IT & C Division Faridabad, India

- **BackupManager:** Engineered a **Python + Tkinter GUI** for automated full/incremental backups across **10–15 department configs**; Wired scheduling, structured logging, and error recovery — cutting processing time by **50%**.
- **Script Scheduler:** Architected a GUI-driven task scheduler with **APScheduler + SQLAlchemy** managing **200+ automated scripts**; real-time execution monitoring with alert thresholds cut supervision by **25%**.

Projects

NewsAI — Multi-Agent News Intelligence Platform | GitHub | Live *Feb 2026 – Mar 2026*
FastAPI, Python, SSE · LangGraph, Groq Llama 3.3 70B · React 19, Vite

- Architected a **3-node LangGraph multi-agent pipeline** (Fetch → Filter → Format) with Groq structured output, lexical fallback, and real-time agent log streaming via **SSE**.
- Implemented **News Navigator**: topic-driven Q&A briefings via **Groq Llama 3.3 70B** with parallel relevance scoring across **7 live RSS feeds** using ThreadPoolExecutor.
- Developed **Vernacular Engine** (Hindi/Tamil/Telugu) with domain glossary generation, 10-min TTL cache, and batch processing of **60+ articles/request**.
- Constructed modular **FastAPI** REST backend with typed endpoints, in-memory caching, and a real-time market widget (SENSEX, NIFTY, USD/INR) via **yfinance**.

SmartAuction | GitHub | Live *May 2025 – Jul 2025*
Flask, REST APIs, WebSockets · Deepgram STT, Gemini 2.5 Flash · React, TypeScript · MongoDB

- Integrated OmniDimension Voice Agent + Deepgram STT + **Gemini 2.5 Flash** into a voice-to-bid pipeline; achieved **<500ms end-to-end latency**, cutting interaction time by **40%**.
- Shipped **React/TypeScript** frontend with WebSocket-based live auction feed and MongoDB wallet transactions secured with **JWT-based RBAC**.
- Assembled a **wallet system** with top-up, All-or-nothing bid deduction, and bid-rollback with automatic refund; tracked every transaction in a dedicated collection for full audit trail.

FixMyRoad | GitHub | Live *Mar 2025 – Apr 2025*
Flask, Python, Celery, Redis · YOLOv8, OpenCV, Scikit-learn · Bootstrap, Jinja2 · MongoDB Atlas

- Deployed **YOLOv8** via Roboflow with **85–90% detection accuracy**; wired async ML inference with **Celery/Redis** and Haversine deduplication over **MongoDB 2dsphere** geospatial index.
- Defined **priority scoring** ($P = 10\times\text{count} + 3\times\text{area} + 5\times\text{upvotes} - 5\times\text{downvotes}$) blending ML severity with community votes for admin triage.
- Powered atomic upvote/downvote toggle via MongoDB **$inc / $push / $pull**; enforced RBAC admin verification, reducing false reports by **30%**.

Infographix | GitHub | **2nd Runner-Up, Genathon 2.0** *Nov 2024 – Dec 2024*
Node.js, Express.js, REST APIs · React, JavaScript · PostgreSQL, MongoDB

- Designed a normalized **PostgreSQL** schema with analytical queries surfacing agent KPIs, call resolution rates, and sentiment trends from large datasets.
- Delivered an **Express.js** REST API consumed by a React dashboard with real-time drill-down filtering on agent performance and customer feedback metrics.

Technical Skills

Languages	Python, JavaScript / TypeScript, C++, SQL
AI Frameworks	LangGraph, LangChain, LLM APIs (Groq / Gemini / OpenAI), Prompt Engineering, PyTorch (basics)
ML / Data	RAG pipelines, Scikit-learn, Pandas, NumPy, OpenCV, YOLOv8
Vector / Search	FAISS, ChromaDB, semantic search, embedding models
Backend & APIs	FastAPI, Flask, Node.js / Express.js, REST APIs, WebSockets, SSE, JWT Auth
Databases	PostgreSQL, MongoDB, MySQL
Frontend	React 19, TypeScript, Vite, Tailwind CSS, Bootstrap
Tools	Git, Docker (basic), Linux / CLI, Postman, Power BI, Tableau

Achievements & Positions

- **Competitive Programming: LeetCode** Rating **1833, Knight, Top 6.46%** (400+ problems) | **GFG** Institution Rank **26**, GFG 160-Day Challenge | **CodeChef 3 ⋆**, Max Rating 1648.
- **2nd Runner-Up, Genathon 2.0** — IIIT Nagpur National Hackathon (Infographix: PostgreSQL + MERN call analytics dashboard).
- **Corporate Lead, E-Summit 25** (Dec 2024 – Jan 2025): Managed sponsor outreach and cross-functional coordination for an industry-leader speaker series. Certificate
